BIG BAG FILLER DUO

The Coveser Big Bag Filler Duo is designed to guarantee efficient and continuous filling of tubers and other products, improving line productivity and ensuring maximum product care during handling phases.

Thanks to the automated management system and the alternating bags, it ensures high productivity and optimal preservation of the packed product.

TECHNICAL FEATURES

- Powder-coated steel frame
- Compatibility with different bag sizes
- Conveyor belt speed adjustment
- Intuitive operator panel
- Bag presence sensors
- Filling sensors

ADDITIONAL FEATURES

- Fixed protections and sensors
- Automatic bag alternation
- Visual and acoustic signals
- Easy maintenance access
- Intuitive interface
- High efficiency

SYSTEM ADVANTAGES

- ✓ Optimization of operating times
- ✓ Preservation of product integrity
- ✓ Adaptability to various bag sizes
- ✓ Maximum safety during operations
- ✓ Fully automated process

The Big Bag Filler Duo is an innovative system that ensures high productivity, operational efficiency, and optimized management of big bag filling.

SUITABLE PRODUCTS

Ideal for potatoes, tubers, onions, and other agricultural products intended for food processing.

The system is perfect for integration into production lines to optimize filling and packaging management.
