

THE ADVANTAGES OF **BIN FILLER DUO**

Our Bin Filler Duo ensures a delicate and consistent filling of bins with bulk products such as potatoes, tubers, and onions, optimizing operational continuity thanks to an innovative system with alternating double containers.

BIN FILLER DUO

The Coveser Bin Filler Duo is designed to ensure delicate and continuous filling of agricultural products, enhancing the efficiency of the production line and guaranteeing maximum care of the product during the handling phases.

Thanks to the automatic alternation system between two containers, the loading process is fluid and fast, increasing productivity and ensuring a smooth flow without interruptions.

TECHNICAL FEATURES

- Powder-coated steel frame
- Management of bins of different sizes
- Conveyor belt speed adjustment
- Intuitive operator panel
- Hydraulic lifting system
- Bin presence sensors

ADDITIONAL FEATURES

- Protections and crossing sensors
- Automatic bin alternation
- Visual and acoustic signals
- Easy maintenance access
- User-friendly interface
- High operational efficiency

SYSTEM ADVANTAGES

- ✓ Optimization of operating times
- ✓ Maximum product care
- ✓ Adaptability to different bin sizes
- ✓ Maximum safety during operations
- ✓ Fully automated process

The Bin Filler Duo is an innovative system that ensures high productivity, operational efficiency, and optimized management of bin filling.

SUITABLE PRODUCTS

Ideal for potatoes, tubers, onions, and other agricultural products intended for food processing.

The system can be integrated into production lines to ensure continuous product flow and improve packaging management.
