

THE ADVANTAGES OF **DOUBLE-LABEL APPLICATOR**

The Double-Label Applicator is an automatic machine designed for printing and simultaneously applying labels on both the top and bottom of thermoformed trays or ready-made packages.

DOUBLE-LABEL APPLICATOR

The Double-Label Applicator is an advanced system for printing and applying upper and lower labels, specifically designed for the food industry.

Made entirely of high-quality stainless steel, it offers flexibility and efficiency, ensuring maximum hygiene and application accuracy.

TECHNICAL FEATURES

Upper and lower label application

Integrated conveyor belts

No. 2 Printing Groups

Up to 60 labels per minute

Stand-Alone Weighing Scale

Fully constructed in stainless steel

ADDITIONAL FEATURES

Integrated PC

Label customization

"Industry 4.0" Integration

Easy and intuitive interface

SYSTEM ADVANTAGES

- ✓ Maximum versatility
- ✓ Maximum flexibility
- ✓ Energy cost reduction
- ✓ Simultaneous double labeling
- ✓ Maximum customization

The Double-Label Applicator is an advanced system for the simultaneous application of labels.

SUITABLE PRODUCTS

The Double-Label Applicator is designed to label various food products, such as bottles, jars, trays, and food packages.

Thanks to its flexibility, it can handle products of different shapes and sizes, ensuring precise and uniform labeling even in high-production applications.
