

THE ADVANTAGES OF **WEIGHER-BAGGER UNIT**

The Weigher-Bagger Unit is designed to combine high precision and speed in weighing and packaging loose products such as potatoes, chestnuts, onions, and other fresh or dry foods. It ensures a continuous flow, perfect packaging, and waste reduction.

WEIGHER-BAGGER UNIT

The Coveseer Weigher-Bagger with 2 Belts is designed to offer precision, speed, and efficiency in packaging loose fresh and dry products.

The double belt system allows dosing for bags from 3 to 30 kg, with a production capacity of up to 5,000 kg/hour.

Equipped with an electronic control, integrated load cell, and a recipe personalization panel, the machine is robust, easy to clean, and perfectly adaptable to various operational needs.

Complete with "Industry 4.0" automation and connectivity.

TECHNICAL FEATURES

- Powder-coated steel structure
- Production capacity up to 5,000 Kg/hour
- High-precision weighing system
- Recipe personalization panel
- Integrated load cell
- Manual movement wheels

ADDITIONAL FEATURES

- Suitable for bags from 3 to 30 kg
- Quick and easy cleaning
- Suitable for a wide range of products
- "Industry 4.0" integration
- Double belt for greater precision

SYSTEM ADVANTAGES

- ✓ High weighing precision
- ✓ High hourly production capacity
- ✓ Complete process automation
- ✓ Versatility
- ✓ Easy maintenance

Thanks to high precision and speed, the Weigher-Bagger Unit optimizes product packaging, ensuring perfect flow, waste reduction, and consistent packaging.

SUITABLE PRODUCTS

- Potatoes, chestnuts, onions, and other loose foods.
- Fresh and dry foods with customized packaging.
