

THE ADVANTAGES OF

VERTICAL PACKAGING MACHINE

The Vertical Packaging Machine ensures fast, precise and fully automatic packaging of granular and powdered products.
The system optimizes production times by ensuring uniform packages, high process repeatability and maximum operational flexibility for different product types and package formats.

VERTICAL PACKAGING MACHINE

The Coveser Vertical Packaging Machine is designed to automate the packaging of granular, powdered and bulk products, ensuring high precision, reliability and production continuity. The system automatically forms the bag from reel, performs product dosing and completes the cycle by sealing and closing the package.

Available in several configurations and easily integrated with different dosing systems, the machine can handle multiple package formats and product types, adapting to the customer's specific production requirements. Recipe management via touchscreen panel, together with integrated control and traceability systems, ensures efficient, repeatable and easily monitored processes.

TECHNICAL FEATURES

- Fully stainless steel structure
- Automatic bag forming system
- High-reliability sealing system
- PLC with touchscreen operator panel
- Production recipe management
- Integrated data logger

ADDITIONAL FEATURES

- Available in different configurations
- Quick and easy format changeover
- Modular and configurable structure
- Integration for automatic production lines
- Reduced routine maintenance
- Compliant with current CE regulations

SYSTEM ADVANTAGES

- ✔ High dosing accuracy
- ✔ High productivity and operational continuity
- ✔ Reduced labor costs
- ✔ High flexibility for different products
- ✔ Uniform and repeatable packages

Designed to ensure high production efficiency, maximum operational reliability and ease of management throughout every stage of the process.

SUITABLE PRODUCTS

Thanks to its high flexibility, the Vertical Packaging Machine can be used for packaging cereals, legumes, rice, dried fruits, snacks, seeds, spices, powder blends, animal feed, granular fertilizers and, more generally, a wide range of bulk products intended for various industrial sectors.
